 - Upland Open Space Habitat Conservation, Restoration, and Mitigation
 - Lowland Open Space Habitat Conservation, Restoration, and Mitigation
 - Public Interpretive Trail
 - Drainage Management Areas ⁽²⁾
 - Consolidated Oil Sites / Non-exclusive Access Easement
 - Oil Site Buffer

⁽¹⁾ The names attributed to Site Planning Areas in the Open Space Preserve are generalized and based upon the Habitat Restoration Plan (NBR MDP Appendix A). Other types of habitat may be included in these Site Planning Areas.

⁽²⁾ These constructed basins will utilize native wetland habitat for treatment function within the limits of the basin. These basins will also require long-term Safe Harbor maintenance agreements with the Resource Agencies within the physical limits of the basin to ensure maintenance activities are performed on a routine basis to maximize water quality treatment and/or energy dissipation functions.
